DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Figure 2 (including Figure 2A) and claims 1-16, 18-23, 24-27 in the reply filed on 6/30/05 is acknowledged.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the followings must be shown and properly identified by reference numerals or the feature(s) canceled from the claims 1-13 and 18-27. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2839

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

- Annular groove to be an ellipse or circle.
- One additional annular groove.
- Means to preclude arcing between the cable assembly and the receptacle.
- Joint between the terminal element and the cable.
- Plurality of conductive elements disposed within the terminal element.
- Conductive elements in electrical communication with conductors of the cable.
- Plurality of contacts in electrical communications with the conductive elements.

Specification

3. The following is a quotation of an appropriate paragraph of 37 CFR 1.75:

(d) The claim or claims must conform to the invention as set forth in the remainder of the specification and the terms and phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description. (See 1.58(a)).

4. Specification is objected under 37 C.F.R. 1.75(d) because the followings have not been described in the specification.

- Plurality of conductors of a cable.
- Attachment between the fitting and the terminal.

Art Unit: 2839

- Joint between the terminal element and the cable.
- Plurality of conductive elements disposed within the terminal element.
- Conductive elements in electrical communication with conductors of the cable.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-13 and 18-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The followings have been neither described in the specification nor shown in the drawings.
